Attaching Bracket Installation Instructions**

Note: The plastic skid plate will have to be trimmed or removed.

1. Remove the bottom plastic skid plate. The skid plate will need to be modified to be re-installed while using this blade mount kit. Cut out area shown highlighted in white with hacksaw or other cutting tool. Re-install back section before installing blade mount. *See picture below.*

2. Install U-bolts into place over frame and over front footrest supports. (Square U-bolts over footrest supports may be hard to insert and will sit crooked until tightened fully)

3. Install the blade mount loosely. Tighten the rear nuts on square U-bolt first to square the U-bolt up. The blade mount will trap tab created on rear section plastic skid plate between ATV and blade mount. Tighten remaining hardware.

4. Re-install front section of plastic skid plate.
5. If using the Cycle Country Manual Lift System, route the lift strap as shown below.

6. If using the Cycle Country Electric Lift System, route the lift strap as shown below.
